

INTRODUCING THE NEW tesa[®] 4646 GREENHOUSE REPAIRING TAPE

Easy to apply, long-lasting, for stable plant growth

- Efficient application with high initial bond on greenhouse film
- Durable repair solution, even during the rainy season
- For healthy plants and high yields

A DURABLE GREENHOUSE REPAIRING SOLUTION

Modern film-covered greenhouses are cost-effective, but very susceptible to damage. Once the polymer film is perforated, heat can escape. Water or insects can enter and harm the plants, resulting in loss of yield.

With the dedicated tesa® 4646 Greenhouse Repairing Tape the necessary patching can be carried out quickly and easily, with better, more lasting results. The tape is easy to apply and can withstand rain and sunlight for long periods without losing its bond nor its transparency.

Product features

- High initial bond on greenhouse film
- Durable and protective
- Excellent weather & UV resistance for at least 12 months
- Nearly invisible, transparent tape for permanent use

Technical data

Product	Backing	Thickness	UV-Resistant	Peel adhesion on PE
tesa® 4646	Transparent PE film	180 µm	52 week	2 N/cm

Step 1: Check film regularly for damages

Step 2: Apply tesa® 4646 on a dry and clean surface

Step 3: Repeat on the inner layer

Results: Healthy plant growth all year round

Product available in 50 mm, 75 mm, 100 mm and 150 mm width; 33 m length. Please contact us for further information.
